

10/29/08

This supplemental cultural resource study along Bowers Beach Road extends from E. Popular Street to Skeeter Neck Road. For ease of the supplemental review, the properties investigated by A.D. Marble and Company, Inc. begin on the northeast end and move towards the west (SR 1/US 113). From there properties evaluated include the south side of Bowers Beach Road and travel east. Ten individual evaluations were included and those properties were delineated with a green highlighter.

In addition, Barretts Chapel Road includes a number of properties on both direct and indirect effects that could be applicable towards the Little Heaven project undertaking. For purposes of the Little Heaven project and Barretts Chapel Road improvements, all properties were included for project clarity and to avoid continual spot evaluations.

DelDOT agrees with eligibility findings and recommendations for the Little Heaven supplements and the Barretts Chapel architectural evaluations. Some technical comments will be shared by DelDOT qualified staff to the SHPO within the 30-days review.
